Dr. Zeoli is an Associate Professor in the School of Criminal Justice at Michigan State University. Her research focuses on the impact of state-level firearm laws on homicide and the implementation of those policies at the local level. She is primarily interested in firearm policies that restrict high-risk individuals from purchase and possession of guns and those that facilitate the implementation of firearm restriction policies. Her main field of investigation is the prevention of intimate partner violence and homicide through the use of policy.

"MY RESEARCH INVESTIGATES WHETHER POLICIES DESIGNED TO REDUCE INTIMATE PARTNER VIOLENCE AND HOMICIDE HAVE AN IMPACT."

**STATISTICS**

States that prohibit a person convicted of a violent misdemeanor crime from accessing firearms experienced a 23% reduction in intimate partner homicide.

When states extend their domestic violence restraining order firearm restriction to dating partners, they saw a 13% decrease in intimate partner homicide.

When states allow judges to require relinquishment of guns by people who are prohibited from possessing them due to domestic violence restraining orders, there is a 12% decrease in intimate partner homicide.
